Education

SavitriBai Phule Pune University   **Sep. 2019 – May 2022**
Bachelor of Science, CGPA- 9.28   *Akurdi, Maharashtra*

VPS College   **Sep. 2017 – May 2019**
Higher Secondary, - Percentages- 73.38   *Lonavala, Maharashtra*

Experience

NITS   **Jan 2024 – Present**
Full Stack Developer   *Vadodara, Gujarat*

- Developed and maintained websites and web applications using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Leveraged MongoDB and Mysql as the databases to store and manage application data efficiently.
- Utilized Express.js to build robust and scalable server-side applications, handling routes, middleware, and HTTP requests. And validating user inputs using libraries like ZOD and many more.
- Developed interactive and user-friendly front-end interfaces using React.js, incorporating state management with Recoil and Context API.

NITS   **August 2024 – Jan 2024**
Full Stack Developer Intern   *Vadodara, Gujarat*

- Assisted in development of the front end of a web application using react framework.
- Also contributed in developing ecommerce website which helped me in having good knowledge about frontend
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Utilized Java programming knowledge to built Telegram bot for client.

Projects

Portfolio Website | *javascript, react js, css,*   **Github / Live**

- Developed a personal portfolio website using React.js and deployed it on Vercel for hosting.
- I Integrated the Animate.css library to add dynamic animations to various elements of the website, enhancing user engagement and visual appeal.
- Utilized React Router DOM for seamless navigation between different pages and routes within the website, providing a smooth browsing experience.
- Did this as hobby and my intial project, gained valuable knowledge about react router dom and react js by coding this website. Also used github to manage different version and deployed it on vercel.

Walmikee Blog app | *Javascript, next js, next auth, mongodb*   **Github / Live**

- Developed a dynamic blogging website using Next.js, a React framework known for its server-side rendering capabilities, providing a fast and efficient user experience.
- Integrated NextAuth.js for authentication, allowing users to sign up, log in, using google, gihub and facebook, and securely access the blogging platform.
- Utilized MongoDB, a NoSQL database, to efficiently store and manage blog posts, user data.
- Leveraged Next.js's dynamic routing capabilities to create SEO-friendly URLs for individual blog posts, enhancing the website's overall search engine ranking.

Realtime Chat Application | *Javascript, socket.io, tailwind css, daisy ui*   **Github / Live**

- Designed a chat application to understand socket.io and realtime commnication
- Used mongodb to store user details and chat history
- Also Explored utility first css framework tailwind css and daisy ui for using prebuiltui components.

Technical Skills

Languages: Javascript, HTML/CSS, Java, SQL, Typescript
Developer Tools: VS Code,Figma, Eclipse, Postman, Maven, Git (version control)
Technologies/Frameworks: Linux, GitHub, React, Next js, Express, MongoDb, MySql, Prisma ORM, socket.io, Tailwind
